

EASY APPLICATION

1 PREP

Sand the selected areas flat. Clean with de-greasing soap and mask-off the area before applying KiwiGrip.

2 APPLY

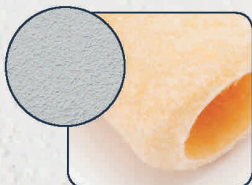

Apply and spread KiwiGrip onto the prepped surface. KiwiGrip can even be applied on top of other non-skid surfaces.

3 ROLL

Use the roller to achieve the texture you desire. For more aggressive non-skid allow coating to dry slightly then lightly roll again.

MILD TEXTURE

For a smooth to mild texture use a standard $\frac{3}{8}$ " nap roller found at your local hardware store.

MEDIUM TO AGGRESSIVE TEXTURES

To achieve a more aggressive texture simply vary the amount of pressure applied to the roller during the application process. Heavier pressure will result in a more aggressive texture. Backrolling once the paint has had the opportunity to dry for a short period of time (recommend letting it cure in 5 minute intervals then backrolling until desired texture is achieved) will pull the peaks of the paint up even higher resulting in a much more aggressive texture.

KiwiGrip

Non-Skid Deck Systems

KiwiGrip is a revolutionary, durable, non-skid coating that spreads quickly and easily with our proprietary roller, offering a beautiful, high traction surface. By varying the application technique, the texture can be adjusted with the roller from a mild texture to an industrial, aggressive grip texture.

- **WATER BASED NON-SKID COATING**
- **LOW-GLARE, IR REFLECTIVE FINISH***
*DOES NOT APPLY TO BLACK OR CUSTOM TINTED COLORS
- **NON-TOXIC, NO VOLATILE SOLVENTS**
- **EASY TO APPLY**

As a homogeneous material, KiwiGrip doesn't suffer from the problems encountered with products filled with sand, walnut shells, beads, rubber fleck, or other fillers. Coatings with fillers tend to wear through, and the fillers fall out leaving an unsafe deck that's hard to clean and even harder to re-coat.

* 4L KiwiGrip box contains four 1L pouches of KiwiGrip.

PYI has developed a packaging system for KiwiGrip non-skid coating. No more dealing with cans, instead KiwiGrip will now come in bags.

Unused paint left in cans often dry out and becomes unusable. By switching to bags this will help to eliminate waste.

During the shipping process, cans that become dented would often have the lids pop off, thus resulting in loss of material and mess. The bag design is much more forgiving of impacts.

APPLICATIONS

- Residential decks
- Work place safety
- Stairs
- ramps
- Paddle sports
- Concrete
- Scaffolding
- Boat Decks
- Docks
- Water parks
- And many more...

COVERAGE

20 square feet per 1L can
80 square feet per 4L can

PERFECT TEXTURE

Apply over wood, fiberglass, epoxy, concrete or metal and dial in the perfect texture for your application by varying your technique.

DURABLE

KiwiGrip is a very hard acrylic polymer providing a durable, homogeneous, elastic surface. Although durable, KiwiGrip is soft enough to walk on with bare feet. KiwiGrip will not wear through and expose filler materials.

COLOR OPTIONS

Loaded with UV stabilizer for consistent color. Available in five standard colors, black, white, cream, light gray and light blue. Custom colors are also an option. You can buy our white KiwiGrip and take it to your local paint store and have them tint it and shake it for you.

NON-TOXIC

Non-toxic, no volatile solvents, very low VOC. Cleans up with soap and water.

TESTIMONIALS

"Kiwigrip is the best invention ever and sure is a wonderful alternative to the normal non-skid do it yourselfers! I've had a lot of friends and other boat owners drop by to see the deck and they are all in awe of how pretty it looks. I'm sure you'll be getting more orders from Hawaii since they all asked for your email address and I showed them the info you sent me on application. It really sells itself."

— Sammy, Honolulu, Hawaii

"KiwiGrip was a dream to use. It is a quick, no-mess way of cleaning up tired old decks and applying a superior non-skid finish. It covered all of the spots where I have moved deck fittings and filled the unwanted holes with epoxy. They literally vanish under KiwiGrip. So far my KiwiGrip decks have endured record heat, kids, burning embers, beer, ice, snow, and sea otters without a mark. My next boat will also have KiwiGrip on the decks."

— Brad, Nanaimo, BC

Superior non-slip traction for just about any application!
